What is this product?

BOCHK China Equity Fund is a sub-fund (the “Sub-Fund”) under the BOCHK Investment Funds, which is an umbrella unit trust established under the laws of Hong Kong.

Objectives and Investment Strategy

The Sub-Fund is an equity fund which aims to provide investors with long-term capital growth through investment mainly in the listed equities and equity related securities (including warrants and convertible securities) of companies whose activities are closely related to the economic development and growth of the economy of the People’s Republic of China (“PRC”).

The Sub-Fund may employ a portion of its assets in futures contracts, options or forward currency transactions for the purposes of efficient portfolio management and hedging against exchange rate risk.

Cash and debt securities may be considered when appropriate.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. Investment risk

The Sub-Fund is an investment fund. The Sub-Fund's investment portfolio may fall in value and therefore, investors' investment in the Sub-Fund may suffer losses. There is no guarantee in respect of repayment of principal.

2. Single country and concentration risk

The Sub-Fund mainly focuses its investments on investment instruments that are related to the economic growth or development of the PRC which increases the Sub-Fund's vulnerability to the economic, political or regulatory or tax developments of the PRC. This may also result in greater volatility than portfolios which comprise broad-based global investments.

3. Market risk

Market risk includes such factors as changes in economic environment, consumption pattern and investors' expectation etc. which may have significant impact on the value of the investments. Usually, emerging markets tend to be more volatile than developed markets and may experience substantial price volatility. Options, warrants and derivatives in the Sub-Fund may also expose the Sub-Fund significantly to the fluctuations in the market. Market movement may therefore result in substantial fluctuation in the Net Asset Value per unit of the Sub-Fund.

4. Derivative instruments risk

The Sub-Fund may use derivatives as one of its investment strategies. Derivatives may be more sensitive to changes in economic or market conditions and could increase the Sub-Fund's volatility or expose the Sub-Fund to losses that exceed the cost of the derivatives.

5. Credit and counterparty risk

The issuer, guarantor or counterparty to a financial instrument in which the Sub-Fund invests may default on its payment obligations or otherwise be unwilling or unable to honor its contractual obligations. This may affect the value of the investments or the amount that the Sub-Fund may receive from the financial instruments. The performance of the Sub-Fund may therefore be adversely affected.

6. Tax risk

Dividends and certain interests or other income paid to the Sub-Fund may be subject to tax on trading profits or on certain securities transaction, transfer or stamp duty or withholding tax which may negatively impact on the Sub-Fund's performance and distributions (if applicable) that the Unitholders may receive from the Sub-Fund.

Is there any guarantee?

The Sub-Fund does not provide any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

At present, only Class A Units will be offered for subscription by investors. Summary of fees and charges for Class A Units of the Sub-Fund is listed below.
