#### What is this product?

NCB China Resources Opportunities Fund (the “Sub-Fund”) is a sub-fund under the NCB Investment Funds, which is an umbrella unit trust established under the laws of Hong Kong.

#### Objectives and Investment Strategy

##### Objectives

The Sub-Fund seeks to capture medium to long-term capital appreciation opportunities through investment in a diversified portfolio of resources and energy related investment instruments that are related to the economic growth or development of the People’s Republic of China (“PRC”).

##### Strategy

The Sub-Fund will mainly invest in equities or equity-related securities primarily traded on the various stock markets in Asia Pacific including but not limited to those in Australia and New Zealand, Hong Kong, South Korea, Singapore, Malaysia and Taiwan. The Manager has no current intention to invest in Japan but may do so in the future if suitable investment opportunities arise. Such securities are mainly issued by companies engaged in or have businesses related to the exploration, extraction, mining, development, production, processing, refining, distribution or trading

of natural resources or energy. Such natural resources or energy may include, but are not limited to, oil, coal, gas, water, renewable energy, gold, aluminium, minerals, metal, industrial minerals, timber or chemicals.

Cash and debt securities may be considered when appropriate.

The Sub-Fund may employ a portion of its assets in future contracts, options or forward currency transactions for the purposes of efficient portfolio management and hedging against exchange rate risk.

## What are the key risks?

**Investment involves risks. Please refer to the offering document for details including the risk factors.**

### 1. **Investment risk**

The Sub-Fund is an investment fund. The Sub-Fund's investment portfolio may fall in value and therefore, investors' investment in the Sub-Fund may suffer losses. There is no guarantee in respect of repayment of principal.

### 2. **Industry or sector risk**

The Sub-Fund invests primarily in single, limited or specialist sectors. As a result, the Sub-Fund may be subject to greater risks and market volatility than a fully diversified investment portfolio covering different economic sectors.

### 3. **Single country and concentration risk**

The Sub-Fund mainly focuses its investments on investment instruments that are related to the economic growth or development of the PRC which increases the Sub-Fund's vulnerability to the economic, political or regulatory or tax developments of the PRC. This may also result in greater volatility than portfolios which comprise broad-based global investments.

### 4. **Market risk**

Market risk includes such factors as changes in economic environment, consumption pattern and investors' expectation etc. which may have significant impact on the value of the investments. Usually, emerging markets tend to be more volatile than developed markets and may experience substantial price volatility. Options, warrants and derivatives in the Sub-Fund may also expose the Sub-Fund significantly to the fluctuations in the market. Market movement may therefore result in substantial fluctuation in the Net Asset Value per Unit of the Sub-Fund.

### 5. **Tax risk**

Dividends and certain interests or other income paid to the Sub-Fund may be subject to tax on trading profits or on certain securities transaction, transfer or stamp duty or withholding tax which may negatively impact on the Sub-Fund's performance and distributions (if applicable) that the Unitholders may receive from the Sub-Fund. Changes in PRC tax policies may affect adversely the performance of companies with activities closely related to the economic development of the PRC. Any change in the tax laws may reduce the income and therefore affect the Net Asset Value of the Sub-Fund.

### 6. **Derivative instruments risk**

The Sub-Fund may use derivatives as one of its investment strategies. Derivatives may be more sensitive to changes in economic or market conditions and could increase the Sub-Fund's volatility or expose the Sub-Fund to losses that exceed the cost of the derivatives.

**Is there any guarantee?**

The Sub-Fund does not provide any guarantees. You may not get back the full amount of money you invest.

**What are the fees and charges?**

At present, only Class A Units will be offered for subscription by investors. Summary of fees and charges for Class A Units of the Sub-Fund is listed below.
