- **Counterparty risk** – The fund will be subject to the risk of the inability of any counterparty through or with which the fund conducts the FDI transactions to perform its obligations, whether due to insolvency, bankruptcy or other causes.
- **OTC transaction risks** – FDI traded in OTC markets may be more volatile and less liquid. Its prices may include an undisclosed dealer mark-up which a fund may pay as part of the purchase price.

2. Concentrated geographical locations

The fund investing in concentrated geographical locations may be subject to a higher level of risks comparing to a fund investing in a more diversified portfolio/strategy.
